

**Titan Trailers  
Custom Built For**

# Construction & Demolition

48' V-Floor Wedge

53' Tipper

Tub Dump

- Moving Floor Trailers
- "Extreme-duty" Trailers
- Tipper Trailers
- Semi-dump Trailers
- Tub Dump Trailers

**More payload • Lower fuel cost • Longer life**

- Original THINWALL™ body construction
- Full range of models to 53 ft.
- Custom axle configurations: tandem, lift-axle, multi-axle
- Customize to your application: drum & hub assembly, suspensions, tires, rims, landing gear, plus other specifications

*Strength Through Innovation*

# Custom built for the business you're in

From our famous THINWALL™ moving floor trailers and tippers to our innovative semi-dumps, “extreme-duty” aluminum and steel-body models, Titan trailers are renowned for long lasting strength in the most demanding jobs. But our real strength is custom-designing and building the right trailer to help your business drive for the bottom line.

**Only the original THINWALL gives you the patented end-to-end strength of double-welded double-wall extruded aluminum.**

Titan THINWALL is the only aluminum smoothside that's **100% machine welded** from end to end, inside and out. Full-length horizontal welds allow **better flexing** over rough terrain. The hollow-core ribs reduce inside punctures and virtually **eliminate exterior sidewall damage**.

**48' Walking Floor**

## More uptime

- protective LED light housings • stainless steel hydraulic lines
- “service-friendly” undercarriage • stainless steel and anti-rust fasteners

## More years

- 6061-T6 extrusion-grade aluminum body • crossmembers interlocked and welded into side panels • one-piece front gusset • bimetal joint buffers
- stainless steel liner between the suspension and main frame • double-wall side panels

## More pay per payload

- 10% more cubic capacity • patented aluminum coupler reduces weight by 300 lbs. • smoothside panels and light weight save 15% of fuel costs

## 48 ft. V-Floor®

Built to handle hot loads, this custom 48 ft. V-Floor® THINWALL trailer transfers asphalt at a smooth consistent rate, eliminating segregation of the hot mat while the operator keeps the load level, safe and under complete control.

**V-Floor® unloader systems** resist “extreme duty” loads with overlapping steel slats or new lighter weight V-18 aluminum slats.

The “flow-through” tailgate on Titan tipper trailers greatly reduces drag and cuts down fuel costs.

**Patented aluminum coupler** reduces weight by 300 lbs. for more payload and fuel efficiency without sacrificing strength.

**Heavy-duty top rails** are sloped for shedding and provide the extra strength to stand up to side-loading impacts and stresses.

## Customer driven:

**Titan Kicker Plate™** keeps compacted material moving.

**Front access door** allows easier servicing and viewing access of trailer interior while unloading.

**Lift-up shedder** for simple clean-out.

**Side-rolling tarp** is electrically operated for fast closing.

**Axle configurations** matched to local load regulations; steering axles and multi-axle trailers available.

**Service-friendly undercarriage** simplifies access and maximizes workspace for routine maintenance.

Titan uses KEITH® **WALKING FLOOR®** self-unloader systems.
