

**Titan Trailers
Custom Built For**

Waste Handling

48' Tandem Walking Floor

48' Tipper

48' V-Floor Wedge

- Moving Floor Trailers
- "Extreme-duty" Trailers
- Tipper Trailers
- B-Trains
- A-Trains

More payload • Lower fuel cost • Longer life

- Original THINWALL™ body construction
- Full range of models to 53 ft.
- Custom axle configurations: tandem, lift-axle, multi-axle
- Customize to your application: drum & hub assembly, suspensions, tires, rims, landing gear, plus other specifications

Strength Through Innovation

www.titantrailers.com

Custom built for the business you're in

From our famous THINWALL™ moving floor trailers and tippers to our smoothwall semi-dumps, heavy-duty flatdecks and “extreme-duty” models, Titan trailers are renowned for long lasting strength in the most demanding jobs. But our real strength is custom-designing and building the right trailer to help your business drive for the bottom line.

Only the original THINWALL gives you the patented end-to-end strength of double-welded double-wall extruded aluminum.

Titan THINWALL is the only aluminum smoothside that's 100% machine welded from end to end, inside and out. Full-length horizontal welds allow better flexing over rough terrain. The hollow-core ribs reduce inside punctures and virtually eliminate exterior sidewall damage.

THINWALL Walk Thru™ B-Train

More uptime

- protective LED light housings • stainless steel hydraulic lines
- “service-friendly” undercarriage • stainless steel and anti-rust fasteners

More years

- 6061-T6 extrusion-grade aluminum body • crossmembers interlocked and welded into side panels • one-piece front gusset • bimetal joint buffers
- stainless steel liner between the suspension and main frame • double-wall side panels

More pay per payload

- 10% more cubic capacity • patented aluminum coupler reduces weight by 300 lbs. • smoothside panels and light weight save 15% of fuel costs

“Rocky Mountain Double” Aluminum

The “Rocky Mountain Double” Aluminum THINWALL A-Train couples two tipper units with a compact 2-axle dolly to move 90,000 lbs. of waste on a highway train less than 95' long.

V-Floor® unloader systems resist “extreme duty” loads with overlapping steel slats or new lighter weight V-18 aluminum slats.

Heavy-duty top rails are sloped for shedding and provide the extra strength to stand up to side-loading impacts and stresses.

Greaseless graphite-impregnated hinge blocks ensure maintenance-free service for top-hinged gates on Titan tipper trailers.

“Flow-through” tailgate on Titan tipper trailers greatly reduces drag and cuts down fuel costs.

Customer driven:

Front access door allows easier servicing and viewing access of trailer interior while unloading.

Lift-up shedder for simple clean-out.

Side-rolling tarp is electrically operated for fast closing.

Titan Kicker Plate™ keeps compacted material moving.

Axle configurations matched to local load regulations; steering axles and multi-axle trailers available.

Service-friendly undercarriage simplifies access and maximizes workspace for routine maintenance.

Titan uses KEITH® **KEITH** WALKING FLOOR® self-unloader systems.
