EXCAVATOR MULCHERS

BL1/EX - BL1/EX/VT

from 50 to 140 L/min

Ø12 cm max

from 4 to 7,5 t

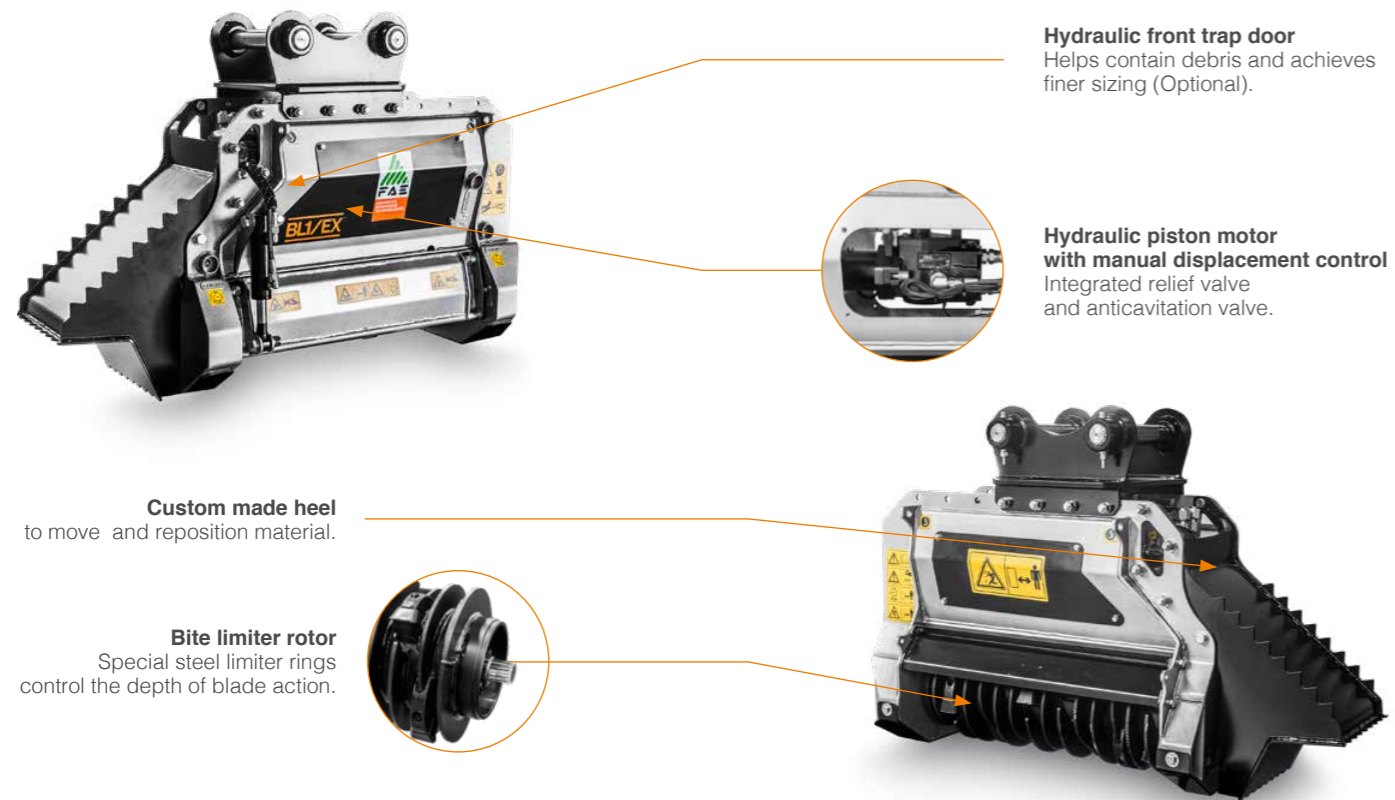

FORESTRY MULCHER WITH BITE LIMITER TECHNOLOGY.

FAE introduces a new line of professional mulchers for excavators equipped with Bite Limiter technology. Special steel profiles limit the depth of blade action, reducing the demand for power, guaranteeing speed and exceptional performance. The BL1/EX - BL1/EX/VT (for 4-7.5 t excavators) has a 800 mm working width and can mulch logs up to 12 cm in diameter. The piston engine (with manually controlled variable displacement) makes it easy to use this mulcher on different excavators with different oil flow rates. The BL1/EX-BL1/EX/VT has a rotor equipped with a heat-treated forged steel tooth holder, together with Type E reversible blades. This light, compact mulcher is easy to maneuver and perfect for various types of forestry work.

STANDARD EQUIPMENT
17/34cc variable manual displacement hydraulic piston motor with relief and anticavitation valve (50 - 130 L/min) (BL1/EX)
55/38cc variable torque hydraulic piston motor (65 - 140 L/min) (BL1/EX/VT)
Flow control system valve
Safety and anticavitation valve
Motor enclosed in the frame
Belt transmission
Bulkhead for hydraulic connections
Front hood with mechanical adjustment

Rotor Bite Limiter
OPTIONS
Diverter valve (plug in and play)
Hydraulic front hood
Dedicated rear hood (deflector)
Dedicated short rear hood (deflector)
Front fixed thumb
Customized attachment bracket with pins
Multiple tooth options

FEATURES

THE COMPACT MULCHER
THAT PACKS A PUNCH

MAIN OPTIONS

MODEL	Flow rate (L/min)		Pressure (bar)		Excavator weight (t)		Working width (mm)	Weight (kg)	Max. shredding diameter (mm)	No. teeth E
	min	max	min	max	min	max				
BL1/EX - 75	50	130	180	350	4	7,5	800	355	120	14
BL1/EX/VT - 75	65	140	180	350	4	7,5	800	355	120	14
